2. I talked with our Security people about him. They are authorized [REDACTED] engineers in their Engineering Branch and are currently understaffed by four. They think of [REDACTED] as being very valuable and would regret to lose him. However, they understand [REDACTED] need for people of this type and would leave the decision entirely up to [REDACTED]. They also understand that he has already been interviewed for a GS-14 job with [REDACTED] group. They are inclined to think that he is not anxious to transfer.
